

PROFESSIONAL SUMMARY

Certified **3X AWS/Azure** Senior Software Engineer with over **4 years of experience** in leading cross-functional teams & delivering **10+ high impact projects**. Specialized in **developing, testing and deploying 100% secure, scalable, robust and high-quality microservices** using Java, Spring Bot, **design patterns**, solid principals and cloud technologies. Proficient in resilient microservices architecture, caching mechanisms, and performance **optimization**, taking **ownership** and **responsibilities**. Enthusiast about transformation to modern **GEN AI based applications**.

TECHNICAL SKILLS

- **Backend Languages/Framework:** Java (8,17,21) J2EE, Spring Framework, **Spring MVC**, Spring REST, Spring Boot, Data JPA, Hibernate & **Spring Security** (OAuth2, JWT), Spring Cloud (Microservices, Config Server, Service Discovery,Zuul, API Gateway) Okta, Lambda, Stream API, Servlet, Design Patterns, Solid Principls,REST API, GraphQL, Pub/Sub, WebSocket
- **Frontend:** React, Angular, TypeScript, HTML, CSS, React.js, Redux
- **Databases:** Oracle, MySQL, MongoDB, Firebase, Redis, Cassandra, DynamoDB, Redis
- **DevOps:** OpenShift, Docker, Jenkins, Kubernetes, automating workflow, terraform, GitHub Actions,ELK stack, Prometheus, Grafana, Kibana

WORK EXPERIENCE

Cognizant Technology Solutions

Pune, MH

Software Engineer (Domain – Banking & Finance) | Spring boot, Angular, Hibernate, Azure, design patterns

Sept 2021 – Now

- Collaborated with **cross-functional** (product owners, architects, and QA, DevOps) and **launched 3 major microservice based applications** in six months this reduced project delivery time by 20% and improved stakeholder and customer satisfaction.
- Led a Domain Driven Design for newly launched Expact onboarding and Digital Outreach in ING KYC area, co-ordinating with downstream microservices and responsible for multiple Spring batch processing, E2E process in KYC area.
- Implemented a **scalable, fault-tolerant microservices** architecture with Spring Boot, **improving throughput by 50%** and reducing **latency by 30%** using asynchronous communication. Ensured **99.9% reliability** with retries, circuit breakers, and fallbacks
- Leveraged the powerful caching capabilities of Spring Boot and Redis to improve the performance and responsiveness of the microservices, leading to a **40% reduction in average response** times and reduced server load by 20%
- Built a **high-performance Aggregation** Service in Banking KYC, consolidating data from **10+ microservices** into a single response, **reducing client API** calls by 65% and accelerating end-to-end KYC verification time by 40%, ensuring faster customer onboarding and improved compliance accuracy by leveraging Spring Boot, WebClient, and Async processing to achieve parallel non-blocking calls, reducing latency and improving system scalability ensuring reliability with fault-tolerant patterns and monitoring via Prometheus, Grafana..
- Demonstrated **strong debugging** skills in development and staging environments, identified, and resolved **40+ critical issues** with hotfixes, which led to a **20% decrease in production bugs**.
- Developed a **highly scalable and distributed event-driven robust Kafka** data flow for ING Bank KYC Digital outreach campaigns, requiring **zero maintenance and zero downtime** over years due to comprehensive coverage of edge cases, and successfully processed over **1 million** events per day
- **Custom Spring Boot library** - Developed and deployed a reusable **custom Spring Boot library/dependency** using CI/CD to Azure Artifact, that streamlined common functionalities, reducing development time by 40% and getting **used in 10+** projects seamlessly.
- Developed a modular **CI/CD pipeline template** adopted across **25+ internal teams**, enabling **automated post-deployment checks** including API performance monitoring, **regression testing**, and integration validation. Enhanced the pipeline with **security scanning**, load testing, and real-time alerting, **reducing post-release issues** by 40% and cutting **onboarding time for new services** by 60%

PROJECTS

Retail Banking | **Team size:** 5 | **Role – Leader** | **Tech:** Angular,, HTTP Client, Spring Security, GitHub Action

[GitHub/retailbank](#)

Multi-Services Software | **Team size:** 3 | **Role:** Developer | **Tech:** Redis, Spring Cloud,

[GitHub/retailbank](#)

- Role-based access control, increased productivity by 50% and got profits of approximately double annually. having 500+ active users.
- Features: Wallet system, **payment gateway** integration, Invoice, Multi-step & highly customized more than 20 services application forms,

Movie Booking | **Individual** | **Tech:** Angular, HTTP Client, Spring Security, reactive programming

[GitHub/retailbank](#)

CERTIFICATIONS/COURSES

- **AWS Certified** Solution Architect - Professional
- **Microsoft Certified AZ400** Designing solutions on azure DevOps
- **AWS Certified** Developer Associate
- **Azure Certified AZ204** Developer

ACHIEVEMENTS & AWARDS

• **Star Performer of month** • Security Champion • **Git Master** • GenC honour • Consecutively **3-time Outstanding Performance award**
WINNER of ING KYC Hackathon-Beyond Delivery: Innovative GenAI Idea for KYC onboarding flows

EDUCATION

Government College of Engineering, Jalgaon - Bachelor of Technology in Computer Engineering

Aug 2017 – Jun 2021
